

Why Sharps Disposal?

Used sharps (lancets, needles, syringes with needles) are dangerous items. Improperly disposed of sharps is illegal and may hurt others even through shoes and gloves.

Even if You Are Not Infectious...

People who get stuck by your needle do not know that. They may worry or even panic causing them distress and to seek medical care/tests costing them time and money.

Why Medication Disposal?

Safety: Prescription drugs, non-prescription drugs, and supplements are involved in many unintentional child poisoning incidents and improper use.

Environment: Drugs contaminate groundwater and waterways. Many drugs cannot be removed by the water treatment plants and end up in our drinking water, lakes, rivers, and marine ecosystem.

Controlled Substances

Controlled substances are regulated by law enforcement agencies and should be returned to police departments and/or sheriff's offices.

Controlled substances include: Narcotic medications and illegal drugs, such as Codeine, Xanax, Valium, Hydrocodone, Ambien, Vicodin, OxyContin, Percocet, Ritalin, etc

Please Help Reduce Drop-Off Volume

- Recycle your pill containers at home (peel off the label or black it out with permanent marker before recycling).
- Dump pills into plastic baggies.
- Keep liquids, ointments, creams, and gels in their original packaging.

Items Not Accepted/ Accepted:

Not Accepted

- Controlled medications (except at police/sheriff's offices)
 - IV Bags
 - Bloody or infectious waste
 - Personal care products
 - Empty pill containers
 - Hydrogen peroxide
 - Aerosol cans
- ### Accepted
- Rx medications
 - Medicated ointment, lotions, creams, etc
 - Liquid medication in leak-proof containers
 - Pet medications
